07-12 GMC SIERRA 1500 **Upper Class Grille w/ Logo Opening**

TOOLS REQUIRED:

5/16" & 10mm Socket/Ratchet
Phillips & Flat Screwdrivers

PARTS LIST

(10) 2" J Hook Brackets
(10) 6/32 Nylon Lock Nuts
(1) Upper Class Grille

PLEASE READ AND UNDERSTAND ALL INSTRUCTIONS BEFORE INSTALLATION. Auto makers offer varied models to each vehicle and occasionally manufacture more than one body style of the same model. To assure your part is correct; our tech department can be contacted at tech@trexbillet.com to verify fitment or assist with tech questions. All other inquires can be directed to info@trexbillet.com. In the event you do not have internet access please call 1-800-287-5900.

Step 1

Test fit the grille into the opening. Remove plastic rivets securing the radiator cover; on top of the grille. Now remove the four 10mm bolts along the top of the grille. The grille has six metal clips that clip into the core support (2); two behind the GMC logo and four along the bottom. Pull the grille forward; use a slotted screwdriver to release the clips and remove the grille. If a bumper grille is to be installed, install at this time.

Step 2

Center the grille over the factory shell. Place a J hook on each stud; hand thread a nylon lock nut on each screw (Fig 1). Make sure the hooks wrap around the rear edge of the factory grille. Tighten the hardware until the grille is held firmly in place. Re install the motor cover.

Thank you for purchasing a T-Rex Billet Grille.
