## 2015 HYUNDAI GENESIS Upper Class Main Grille

### TOOLS REQUIRED:

Plastic Pry Bar  
Phillips Screwdriver  
8mm 10mm Socket  
Ratchet and Extensions  
Small Flat Head Screwdriver

### PARTS LIST:

(6) 1/2" L-Brackets  
(4) #10 screw 1.5"  
(6) 6-32 Nylon Lock Nuts  
(6) #10 Flat Washers

**PLEASE READ AND UNDERSTAND ALL INSTRUCTIONS BEFORE INSTALLATION.** Auto maker's offer varied models to each vehicle and occasionally manufacture more than one body style of the same model. To assure your part is correct; our tech department can be contacted at [tech@trexbillet.com](mailto:tech@trexbillet.com) to verify fitment or assist with tech questions. All other inquires can be directed to [info@trexbillet.com](mailto:info@trexbillet.com). In the event you do not have internet access please call 1-800-287-5900.

### Step 1 Removal of Radiator Plastic Shroud

Open the hood and remove the plastic push clips securing the plastic radiator shroud to the radiator core. Carefully use a small flat head screwdriver to push in the clips, you can now remove the clips. Once all clips have been removed the plastic radiator shroud can be removed.

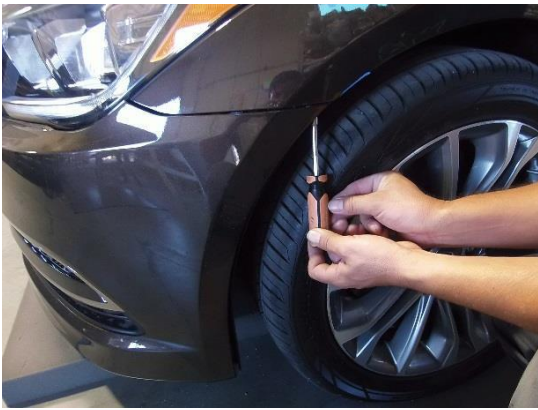

### Step 2 Unmounting of Bumper- Top Section

Using the 10mm socket and ratchet remove the 10mm bolts securing the bumper. Then use a Philips screwdriver and remove the plastic screws.

### **Step 3 Inner Fender Well Bumper Screws Removal**

Using the 10mm socket and ratchet remove the 8mm bolt securing the bumper in the fender well. Now take a Phillips screwdriver and remove the inner screws.

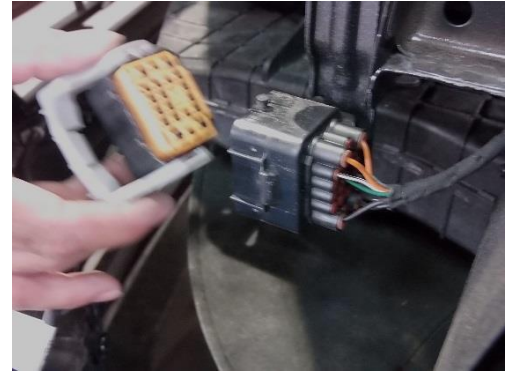

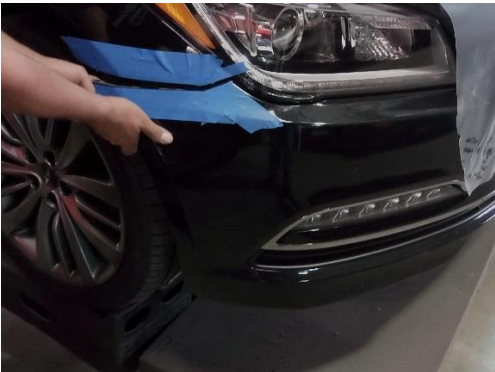

### **Step 4 Bottom Section Screws Removals**

Using a Phillips screw driver remove the plastic screws in the bottom of the bumper trim.

### **Step 5 Removal of the Bumper cover**

Slightly open the sides of the bumper cover to where it's free when you pull it upwards. Next slightly pull up the bumper from the top section and pull the entire bumper out but first unclip the headlamp harness.

Now the entire bumper should come off freely and at this point we recommend spray painting the grille black for better results.

### **Step 6 Grille Installation**

Now thru the front slide the grille aligning the studs thru the 4 pre drilled holes on the original back plate of the stock grille. Now tighten the grille thru the back with the provided 6-32 nylon lock nuts and ½ L shape brackets. Now is also a good time to mount your license plate using the provided #10 1.5" (4) long screws. If you decide not to install the license plate, still support the bottom of the grille with the same screws.

### **Step 7 Reinstallation**

For reinstallation of the bumper and radiator plastic shroud reverse steps.

*Thank you for purchasing a T-REX Grille. 12/03/2014*
